

The Company

Consep is an Australian-owned engineering company delivering innovative technical solutions worldwide. We have recently opened a branch in Donegal, Ireland to support customers across Europe, Africa, and beyond, providing local technical expertise while collaborating with our global teams. Guided by our values of Tenacity, Ingenuity, and Collaboration, we are committed to practical problem-solving and continuous improvement.

The Roll

We are seeking a Process Engineer to support the sales, commissioning, and implementation of our products and systems. This is an office-based role in Donegal, Ireland, with travel to customer sites as required. You will ensure smooth transitions from sales to operational use, provide technical expertise to customers, and oversee commissioning activities.

Key Responsibilities

- Support sales with technical expertise and proposals
- Design, implement, and optimise process solutions
- Oversee installation and commissioning at customer sites
- Develop documentation, manuals, and provide customer training
- Collaborate with engineering, manufacturing, and operations teams

About You

- Degree in Mechanical, Chemical, or related Engineering
- 5+ years' experience in process engineering, commissioning, or applications
- Strong customer-facing and communication skills
- Full, unrestricted driver's licence; willing to travel

What We Offer

- Competitive salary based on experience
- Work with international customers across Europe and Africa
- Be part of a growing European operation
